Education

Bachelor of Technology - Information Technology Anna University, India (VSB Engineering College, Karur) CGPA: 7.89	September 2023 – May 2027
Higher Secondary Education - 12th Standard Percentage: 83%	2023
Secondary School Education - 10th Standard Percentage: 100%	2021

Objective

Aspiring Software Engineer with strong proficiency in Python, Java, and Full-Stack Development. Passionate about building scalable AI-powered applications, solving complex problems, and delivering efficient, reliable, and high-performance software solutions.

Projects

CloudOS-RL – AI-Powered Multi-Cloud Scheduling System Python, FastAPI, PPO, SHAP, Kafka, React, Docker, Kubernetes
Prometheus, Grafana

- Built an AI-driven multi-cloud scheduling platform to solve inefficient workload distribution across AWS, Azure, and GCP by optimizing cost, latency, SLA compliance, and carbon efficiency in real time.
- Implemented a reinforcement learning PPO pipeline with SHAP-based explainability, enabling transparent decision insights, intelligent workload placement, and improved scheduling decisions under concurrent workloads.
- Integrated Kafka, Prometheus, and Grafana for real-time observability, streaming analytics, performance monitoring, and system-level visibility across distributed cloud environments.

Factory Twin – AI-Driven Industrial Monitoring Platform React, FastAPI, PostgreSQL, Scikit-learn, Docker
TailwindCSS, Prometheus

- Developed a full-stack industrial digital twin platform to improve factory visibility through real-time telemetry monitoring, predictive maintenance, anomaly detection, and AI-driven risk analysis.
- Engineered an explainable AI intelligence layer with root-cause diagnostics, predictive ETA estimation, stale telemetry handling, and operational decision guidance for faster operator response.
- Designed reliable frontend and backend workflows using React, FastAPI, PostgreSQL, and Docker, enabling scalable telemetry processing, monitoring, and resilient real-time industrial operations.

Certifications

Programming in Java - NPTEL	Score: 90%
Infosys Springboard Virtual Internship 6.0	Selected

Skills

Languages: Python, Java, C, JavaScript

Web / Backend: HTML, CSS, React.js, Node.js, Spring Boot

Tools / DevOps: Git, GitHub, VS Code, Docker, Prometheus, Grafana, Kubernetes

Networking: TCP/IP, OSI Model, Subnetting, DNS, HTTP/HTTPS

ML / Data: scikit-learn, pandas, numpy, Machine Learning Basics, SHAP

Core Concepts: OOP, DSA, Full-Stack Development, Cloud and Network Fundamentals
